IT Department Manager

NexTech Solutions Philippines Inc.

4th Floor, Tech Hub Building, Mabini Street, Cabanatuan City, Nueva Ecija

Subject: Application Letter for Part-Time IT Support Specialist

Dear Madam:

Good day!

I am writing to formally express my interest in the **Part-Time IT Support Specialist** position at **NexTech Solutions Philippines Inc.** With a solid foundation in network administration, cloud computing, cybersecurity, and system troubleshooting, I am eager to bring my technical skills and dedication to your IT team.

As a certified professional holding industry-recognized credentials including **AWS Certified Cloud Practitioner**, **Cisco Certified Network Associate (CCNA)**, **CompTIA Security+**, **CompTIA A+**, and **Microsoft Azure Fundamentals** I have also developed a comprehensive skill set suited for modern IT environments:

- **Helpdesk & System Support:** Experienced in network administration, hardware/software troubleshooting, and providing reliable technical support to end-users.
- **Cybersecurity & Data Protection:** Knowledgeable in implementing data security protocols, database management (SQL), and maintaining secure network environments.
- **Cloud & Infrastructure:** Proficient with AWS and Azure cloud platforms, version control (Git), and ITIL Service Management standards.

I admire NexTech Solutions Philippines Inc.'s commitment to delivering innovative tech solutions. I am confident that my technical certifications, proactive problem-solving ability, and adaptability in fast-paced environments will allow me to contribute effectively to your department's goals while operating on a flexible part-time schedule.

Thank you for your time and consideration. I look forward to your positive response.

Respectfully yours,

ERROL B. CANCELLAR

I research the opportunity through Canva I saw the template that align to my topic so I add my future skills and my dream to other details to my resume and to the help of Ai it help me to search other needed and it helps me to improve my grammatical mistakes and as of the format of the resume it's was my previous resume so I just updated it also to my work application too And for the rest I saw Canva template that align to my resume so used it I will doing my best always even I using Ai sometimes but I can manage my own work and I did not abusing it and to verify the accuracy of the information I use google and sometimes Ai to see if it's reliable therefore in terms of tools I use one of them was Ai as an editorial tool sometimes an active searching but I will always using my own idea but it also improve by help of Ai I protected my own privacy and other by using crop whether I sending files that contains my information and limiting my self to talking Ai and always taking the accountability when I'm using it.

**ITE 366 Introduction to Computing | Period 2 Checkpoint
INDIVIDUAL REQUIREMENT****Professional Application Portfolio***Resume, Cover Letter, Job/Employer Reference, and Process & Integrity Note***Prepared by:**

Name: Errol B. Cancellor

Student Number: 01-2627-031402

Permit Number: 522911396228

Submitted to:**Jericho C. Bernardo****Subject Teacher**

ITE 366 Introduction to Computing | Period 2 Checkpoint

Professional Application Portfolio

I. Checkpoint Overview

This Period 2 Checkpoint is an individual submission. You will create a professional application portfolio for a real or realistic job, internship, part-time position, or entry-level opportunity. The purpose is to apply information literacy, responsible AI use, professional digital communication, and word-processing skills in one practical output. Your work should look like something you would be willing to send to an actual employer. No oral presentation is required; the portfolio will be evaluated as submitted work.

II. Required Submission

- **Resume**-Create your own one-page resume. You decide the layout, organization, visual style, and section order. Include only truthful information that supports your target position.
- **Cover Letter**-Create your own one-page cover letter for the same position. It must be tailored to the role or organization rather than copied from a generic internet template.
- **Job/Employer Reference**-Include evidence of the opportunity used as your basis. This may be a screenshot of a job post, a company careers page, a reputable job platform listing, or another clearly identified professional source.
- **Process & Integrity Note**-Write a 150-250 word reflection explaining how you researched the opportunity, how you checked the information, and whether AI was used. Write this in your own format and voice.

III. Creative Freedom and Professional Responsibility

There is no required resume or cover-letter template for this checkpoint. You are expected to make your own design decisions. Creativity is encouraged when it improves clarity and professional presentation. A strong application document is not the one with the most colors or decorations; it is the one that presents relevant information clearly, consistently, and appropriately for the target career.

- You may use a traditional, modern, minimalist, or creative layout.
- You may use columns, section dividers, icons, subtle color, and other professional visual elements.
- A professional photo is optional; include one only if you intentionally choose to do so.
- You may organize sections differently depending on which strengths you want to emphasize.
- You may use Microsoft Word, Google Docs, Canva, or another appropriate document tool, but the final output must remain readable and professional.

IV. Module Connections

Module	Skill to Apply	Evidence in the Portfolio
Module 5 - Information Literacy	Search effectively and evaluate credibility, accuracy, bias, and currency.	Use an appropriate opportunity, check the job/employer information, and explain your verification process in the Process & Integrity Note.
Module 6 - Responsible AI Use	Use AI as support, verify output, protect privacy, and remain responsible for the final work.	If AI is used for brainstorming, grammar, wording, or feedback, review and edit it yourself and briefly disclose the use.
Module 7 - Digital Communication & Professional Presence	Apply professional tone, netiquette, and appropriate digital communication.	The cover letter, contact details, profile links, and overall communication should be suitable for an employer.
Module 8 - Word Processing & Document Formatting	Create structured documents using formatting, layout, editing, and document-management tools.	The resume and cover letter should demonstrate clean structure, consistent formatting, readability, and careful proofreading.

ITE 366 Introduction to Computing | Period 2 Checkpoint
Professional Application Portfolio**V. Resume Requirements**

Create a one-page resume that is appropriate for the position you selected. There is no required section order. Choose the information and arrangement that best represent your strengths as a student or future professional.

- Name and professional contact information
- A short objective, profile, or professional summary when appropriate
- Education
- Technical skills and soft skills
- School projects, programming/IT projects, major outputs, activities, or competitions
- Volunteer work, organization involvement, training, seminars, or certifications
- Work experience, if you genuinely have any
- Portfolio, GitHub, LinkedIn, or another professional profile link when appropriate

Do not invent work experience. A student without formal employment can still create a strong resume by presenting relevant projects, responsibilities, training, skills, and achievements.

VI. Cover Letter Requirements

Your cover letter should support your resume rather than repeat it word-for-word. It should explain why you are applying, why you are interested in the role, and how your background relates to what the employer needs.

- Use a professional greeting and closing.
- Identify the specific position you are applying for.
- Show that you understand the role or organization.
- Connect your skills, education, projects, or experience to the position.
- Use specific examples instead of vague claims such as 'I am hardworking.'
- Keep the tone confident, respectful, and professional.
- Proofread names, company details, spelling, grammar, and punctuation before submission.

VII. Job / Employer Reference and Information Literacy

Your chosen job or opportunity should come from a source that can reasonably be used for a professional application. Before using the information, consider the Module 5 CABC checks: Credibility, Accuracy, Bias, and Currency. Your Process & Integrity Note should briefly explain how you decided that the information was usable.

- Credibility - Who published the opportunity or employer information?
- Accuracy - Can important details be confirmed using the employer's official information or another reliable source?
- Bias - Is the information mainly informative, or does it make misleading or exaggerated claims?
- Currency - Is the job post or employer information current enough to use?

VIII. Responsible AI Use and Process & Integrity Note

AI may be used as a support tool, but it must not replace your own thinking, judgment, or responsibility. If you use AI, you are expected to review the output and make the final decisions yourself. Do not place passwords, government IDs, bank details, student records, home addresses, or other unnecessary sensitive information into AI tools.

- Where you found the job or employer information and why you considered the source usable
- What you did to check whether the information was current and trustworthy
- Whether you used AI; if yes, what it helped with and what you personally reviewed, revised, or verified
- How you protected your privacy and avoided sharing unnecessary sensitive information
- One writing or design decision you made to make your application more professional

IX. Submission Format

- Combine the resume, cover letter, job/employer reference, and Process & Integrity Note into one organized submission unless your instructor gives a different instruction.
- Preferred final format: PDF, so the layout remains consistent across devices.
- The original editable file may also be requested for checking.
- Suggested file name: Lastname_Firstname_P2Checkpoint.pdf
- This is an individual submission and no oral presentation is required.

X. Professional Quality Standards

- Information must be truthful, relevant, and appropriate for the target role.
- Design must support readability and professionalism.
- Fonts, spacing, alignment, headings, and visual choices should be consistent.
- Grammar and spelling must be checked.
- The cover letter must be tailored rather than copied from a generic template.
- AI-assisted content must be reviewed and edited by the student before submission.
- Do not include passwords, government IDs, bank details, or unnecessary sensitive personal information.

XI. Grading Rubric - 100 Points

Criteria	Description	Points
Resume Content & Relevance	Clear, truthful, and tailored content. Strong use of education, skills, projects, experience, and achievements appropriate to the selected role.	25
Resume Design & Readability	Original organization, professional visual choices, clear hierarchy, consistency, spacing, alignment, and readability.	15
Cover Letter Quality	Specific to the selected position, professional tone, strong structure, and a clear connection between the student and the role.	25
Information Literacy	Appropriate job/employer source and evidence that credibility, accuracy, bias, and currency were considered.	10
Responsible AI & Integrity	Honest disclosure when applicable, meaningful human review, privacy awareness, verification, and responsibility for the final submission.	10
Digital Professionalism	Professional language, appropriate contact/profile information, and communication suitable for an employer.	5
Overall Polish & Creativity	Thoughtful presentation, originality, proofreading, consistency, and a complete submission that feels ready for a real application.	10
